Age: 21

Address: Lucknow, Uttar Pradesh

The screenshot shows a web browser window with Firefox. The address bar displays the Google Docs URL: <https://docs.google.com/document/d/1yMwO6YGn6LA-d2KokM3am6i6oW-BK9Lya9baetpRR2Y/edit>. The document is titled 'Thimble' and was last edited on August 24, 2017. The document content is as follows:

Project Proposal

Project Title
Collaboration in Thimble (formerly Thimble and Remote Mentorship)

Overview
The audience of Thimble largely consists of teachers, educators and students. One of the most requested feature in thimble is collaboration. Right now only a single user can work on a project. The aim of the project is to allow multiple users to edit the same project at the same time.

Some of the other features that may be added in the future to improve collaboration include video/audio chat, real time audio translation and revision history.

There have been [instances](#) of people migrating to platforms other than Thimble because of the lack of Collaboration features. Through this project, I would like to understand what exactly teachers expect from a language learning environment and implement the same in Thimble. I'll try to finish as many features as I can during my Google Summer of Code coding period and work on the rest after that as people keep suggesting better ones.

The left sidebar shows the document outline with the following items: Thimble, Personal Details, Project Proposal (selected), Overview, Previous contributions to Thimble and Br..., Contributions to y-js, Previous Projects Around Collaboration, Schedule, Research Milestones in the Future, Timeline, Technical Requirements, Benefits of Using Togetherjs, and Benefits of Using y-js. A video of a person wearing a Google sweatshirt is visible in the bottom right corner of the document.
